About me

My goal is to grow as a UX/UI designer in an environment that combines technology and creativity. I consider myself a calm, creative, and analytical person, with an aesthetic eye rooted in art, a discipline I develop in my free time and seek to increasingly integrate into my professional career. I currently work as a Frontend developer with Angular and React, and it is precisely that daily contact with interfaces that deepened my interest in experience design: understanding the user, thinking through structure, making what is seen also work well.

Skills and Languages

UX/UI Design: Figma, Wireframing, Prototyping, User Flows, Design Systems, Atomic Design, Responsive Layouts, UX Research, Illustrator, Photoshop

AI Tools: ChatGPT, Gemini, Claude, Windsurf

Methodologies: Design Thinking, Scrum, Agile, Azure DevOps
